

HOW TO CHANGE TEMPERATURE

This will only temporarily change the temperature if you are in Weekly Programme mode, to change the setpoint temperature in your weekly schedule, please read our 'How to set a schedule' guide.

01

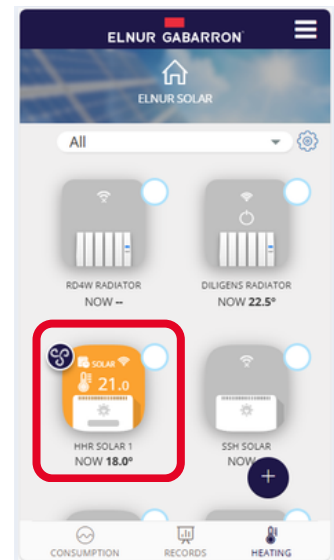

Once you login to the Elnur Gabarron App, you should see the following screen showing your heaters:

If no heaters are shown, please follow our 'How to add a heater to your app' guide or contact our technical department.

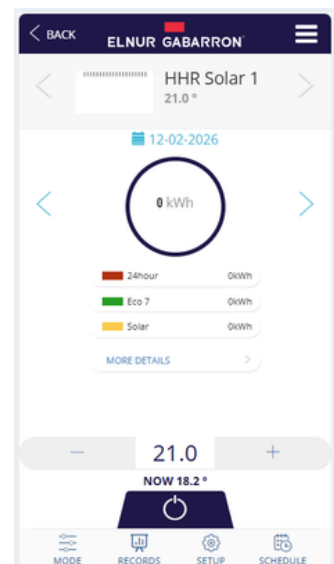

02

Click on the heater that you wish to change the temperature of:

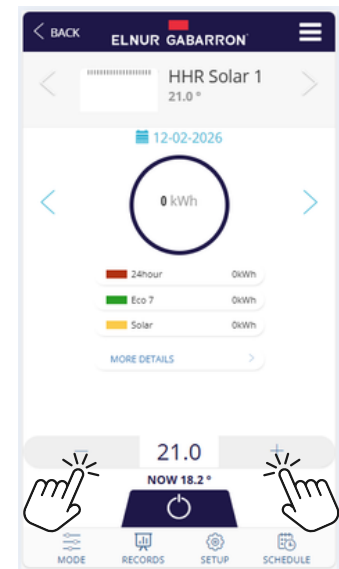

03

Your screen should now look similar to this:

0 4

To edit the temperature, click either the plus or minus button until you get to your desired temperature

Your temperature is now temporarily saved for your selected heater. Copy these steps for any other heaters that you wish to edit. Please note, if you are in the Weekly Programme mode, these changes will only be saved until the next schedule update.
