

HOW TO SET A SCHEDULE

0 1

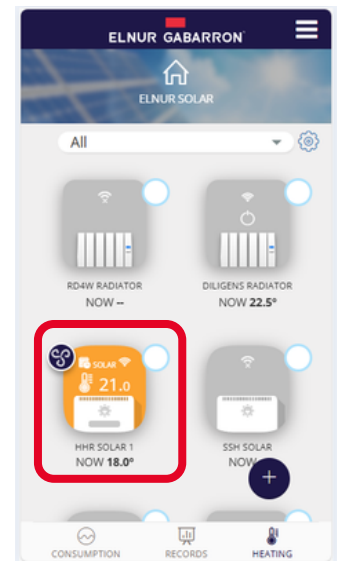

Once you login to the Elnur Gabarron App, you should see the following screen showing your heaters:

If no heaters are shown, please follow our 'How to add a heater to your app' guide or contact our technical department.

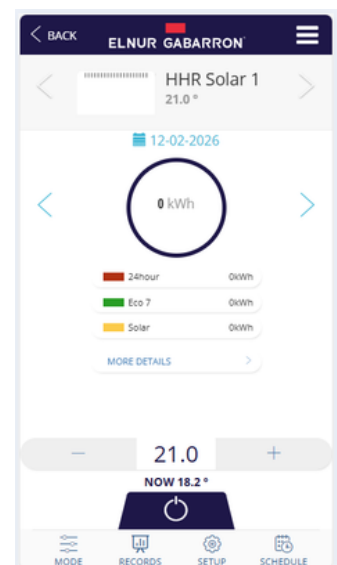

0 2

Click on the heater that you wish to change the schedule of.

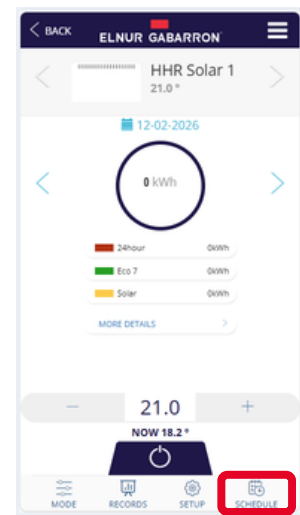

0 3

Your screen should now look similar to this:

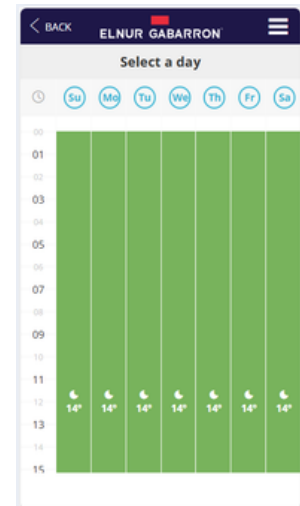

0 4

Click the 'Schedule' menu on the bottom of the screen.

0 5

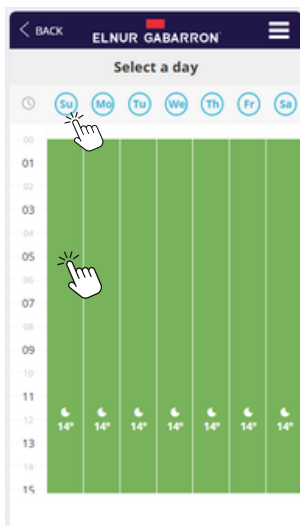

Your screen should now look like the following:

0 6

To edit the schedule for a specific day, click on the desired day.

For example, if you wanted to edit the schedule for Sunday, click on that day's schedule, or select the day from the row at the top of the table.

0 7

Your screen should now look like this:

You will see the schedule split into hourly, editable intervals

08

To edit the scheduled temperature modes, click on one of the three symbols at the right corner of your screen.

This symbol relates to your comfort temperature

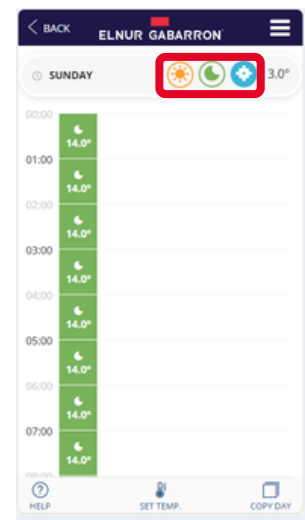

This symbol relates to your economy temperature

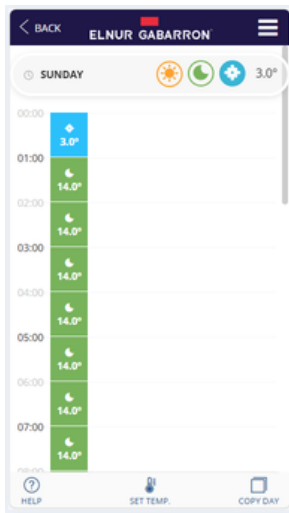

This symbol relates to your frost-protection temperature.

We do not recommend using this temperature mode unless specified to by our technical team. Do NOT use during off-peak hours.

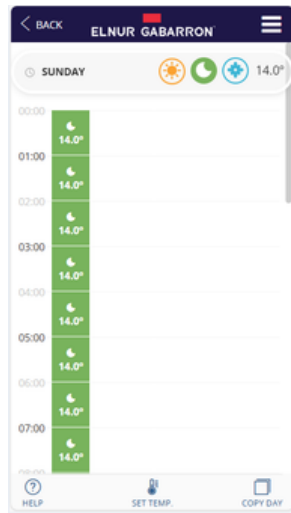

09

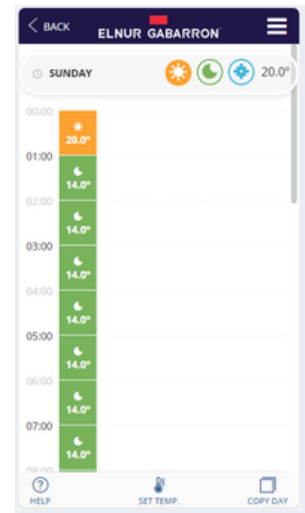

Then, click on the hourly interval that you wish to change. For each option, it will display differently:

If you have changed the temperature to **frost protection**, your display will show the above.

If you have changed the temperature to **economy**, your display will show the above.

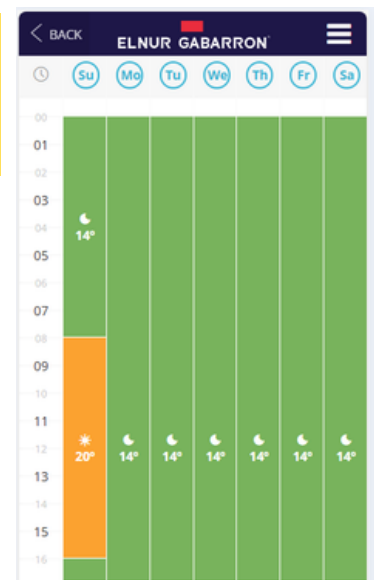

If you have changed the temperature to **comfort**, your display will show the above.

Continue this step until you have edited all of your desired hourly intervals.

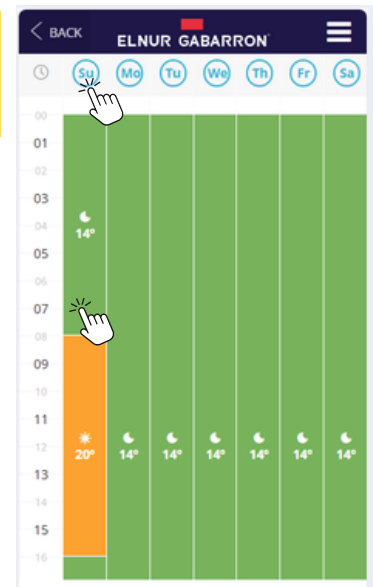

10

Click the back button to see your changes now reflected in the heaters full schedule.

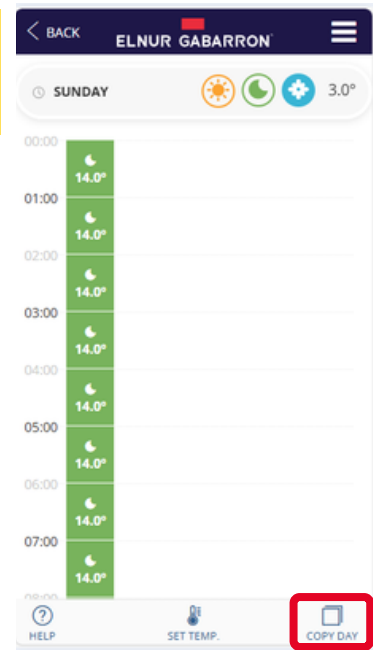

1 1

To copy your days schedule, click on the day you wish to copy.

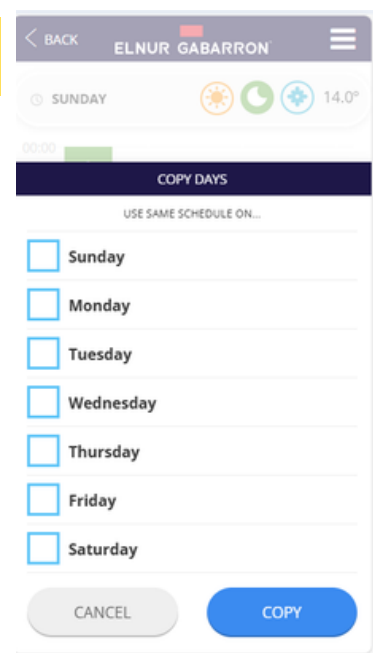

1 2

Click on the copy button at the bottom of your screen.

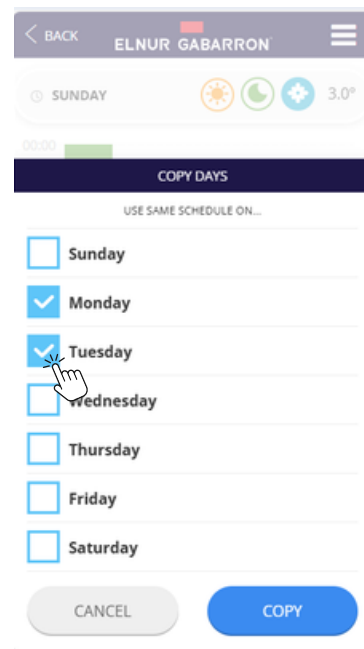

1 3

The following screen should appear:

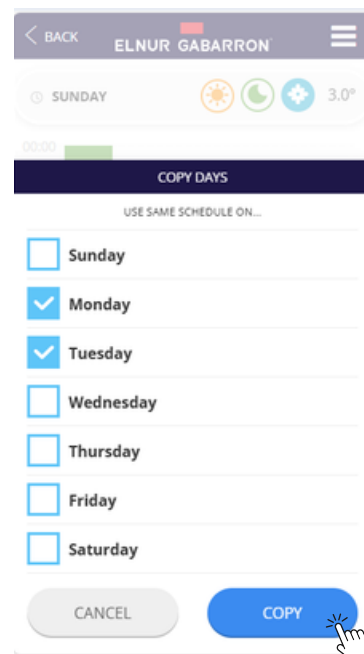

1 4

Click the day(s) that you wish to copy your custom schedule into.

1 5

Click the copy button.

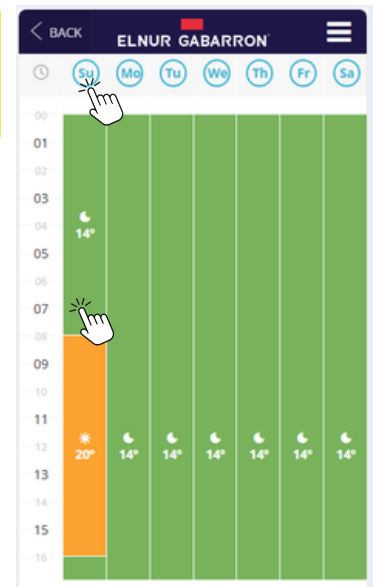

1 5

Your schedule has now been copied into the desired days.

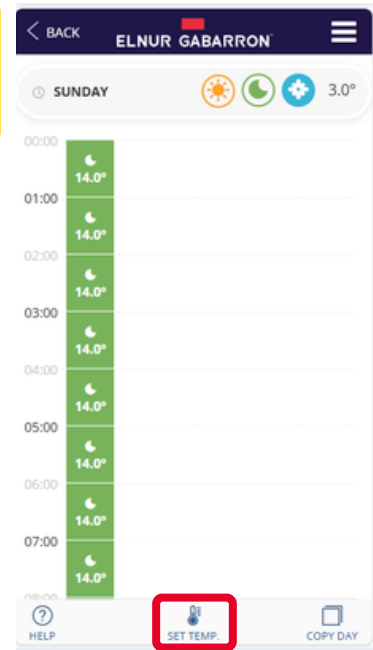

1 6

To edit your setpoint temperatures in the schedule, click on any day.

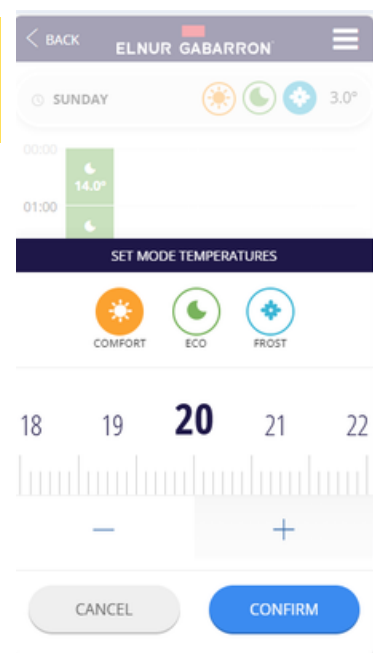

1 7

Click on the Set Temp button at the bottom of your screen.

1 8

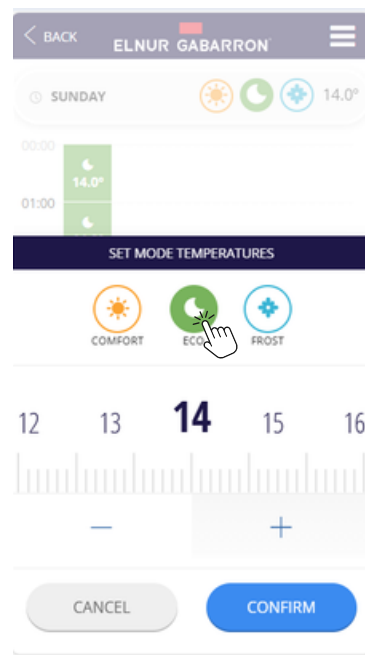

Your screen should look like the following

19

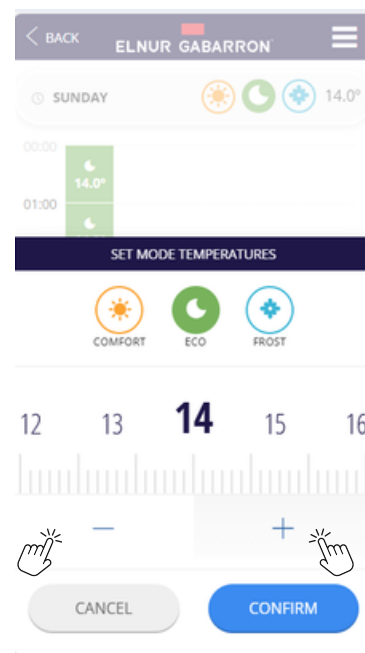

Select which temperature mode (comfort, economy, frost protection) you wish to edit

We do not recommend editing the frost protection temperature setpoints unless specified to by our technical department.

20

Either drag the temperature dial on screen, or press the plus and minus buttons, until you reach your desired temperature

21

Press the confirm button to save the settings
